Expert Advice is Right at Your Fingertips

Clients enrolled in M-Vision's Chief Technology Services are assigned a Chief Technology Officer (CTO) whose priority is to keep their business on the fast track to success. CTO Services give M-Vision clients access to highly experienced professionals who are experts in applying business technology to achieve business goals. Your CTO has the ultimate responsibility for making sure your business is gaining as much value from this service by:

- ▶ Acting as your trusted business technology advisor on all technology issues.
- ▶ Incorporate technology plans that support your overall business strategy and goals
- ▶ Using best practices and processes to guide your business technology decisions
- ▶ Ensuring the best technology investments for your business are producing the highest ROI
- ▶ Monitoring of overall IT managed services performance; ensuring the highest levels of service for our clients
- ▶ Providing assistance with technical documentation to help your business comply with industry regulations

Scheduled, On Demand CTO Calls

Your M-Vision CTO is an extremely valuable asset to your company. Your CTO should be viewed as a strategic part of your executive team; bringing years of industry knowledge to your critical business decisions. You should plan on setting aside time with your CTO for discussion a regular basis, (just as you would any other critical employee.) Meeting with your CTO regularly helps to insure they are up to speed with your company's vision, helping to ensure maximum value is achieved for your organization
